THE BAGO, A MINOR FRUIT OF SOUTHEAST ASIA In terms of plant evolution and because it represents the highest form of the gymnosperms, the bago and its relatives may be considered to represent a transition between a primitive plant group (the gymnosperms with naked seeds) and a modern plant group (the angiosperms with enclosed seeds to which many living, modern-day plant species belong). The bago is a versatile plant. List of culinary nuts - Wikipedia A culinary nut is a dry, edible fruit or seed that usually, but not always, has a high fat content. Nuts are used in a wide variety of edible roles, including in baking, as snacks (either roasted or raw), and as flavoring.
