Texture description and segmentation through fractal ... CONCLUSIONS s related to fractal geometry were proposed as a means of describing and segmenting natural textures. New methods for computing the fractal dimension and lacunarity were developed. The new box dimension estimate was shown to work well in describing and segmenting fractal surfaces. Infrared Image Segmentation by Combining Fractal Geometry ... mathematic tool for image segmentation. 3) Interactive segmentation. Interactive segmentation has been widely applied in many domains, for example, interactive segmentation is suitable used to segment medical image. 4) The research for image segmentation assessment has become a hot point problem in image segmentation domain. Fractal - Wikipedia A fractal in three-dimensional space is similar, however, a difference between fractals in two dimensions and three dimensions, is that a three dimensional fractal will increase in surface area, but never exceed a certain volume. Texture Description and Segmentation Through Fractal Geometry Fractal geometry is receiving increased attention as a model for natural phenomena. In this paper we first present a new method for estimating the fractal dimension from image surfaces and show. Fuzzy Segmentation Of Natural Scenes Using Fractal Geometry Segmentation of an image into meaningful regions is a crucial component in intelligent scene understanding. In images of natural scenes there is a high degree of variability and uncertainty in the features which represent the regions and objects.

An Automated Segmentation Method for Lung Parenchyma Image ... incomplete segmentation of the juxtapleural nodules and segmentation inefficiency, this paper proposes an automated framework to combine the threshold iteration method to segment the lung parenchyma images and the fractal geometry method to detect the depression boundary. Texture segmentation using fractal dimension - Pattern ... Texture Segmentation Using Fractal Dimension B. B. Chaudhuri and Nirupam Sarkar Abstract-This paper deals with the problem of recognizing and segmenting textures in images.
